Your Money Is Needed Now

January 18 marks the beginning of the Fourth War Loan Drive. The people of the United States will be called upon to invest \$14,-000,000,000 in War Bonds. The SGA Victory Committee has begun work on plans to put the campus campaign across, and they need and must have your cooperation.

If you think that you have already bought enough bonds, if you think that the government doesn't need the small sum which you can invest-you are wrong. There has never been a time when the "This Means You" sign has been more appropriate. YOU must do YOUR share.

Don't just buy a few stamps and quit, if that is all you can really afford. If you don't have the money to buy a bond, induce somebody else to buy one.

Money to finance the war might be obtained more easily from large corporate investors and banks, rather than from your slim pocketbook. But money obtained from banks will only win the war, it will not win the peace. To successof current spending power and invested in War

It is simple arithmetic that shows that a problem will be created when the estimated national income for 1944, minus taxes, of 126 billion dollars is contrasted with the 90 billion dollars worth of consumer goods and services

of 36 billion dollars, or lose it to higher prices. respect.

YOU are the consumer. You want to get your money's worth when you buy something. Prices are up and quality is down. Prices will go higher if you keep spending. The biggest dollar's worth you can buy anywhere is a dollar's worth of War Savings stamps.
